Professional Summary

B.Tech Computer Science student specializing in Java, Python, MySQL, and scalable backend automation. Engineered an AI-powered multi-agent hiring screener using LLMs and a data-driven e-commerce recommendation engine. Proficient in full-stack architecture, secure API integration, and database management, with a strong focus on DSA to optimize data pipelines.

Education

Maharishi Markandeshwar (Deemed to be University)

2024 – 2028

Bachelor of Technology in Computer Science Engineering (CGPA: 6.76/10)

Mullana, Haryana

Technical Skills

Languages: Java, Python, SQL

Web Technologies: HTML5, CSS3, JavaScript

Backend: Spring Boot, FastAPI, REST APIs

Database: MySQL, PostgreSQL, MongoDB

AI/ML: LangChain, OpenAI API, Azure AI, Vector Search

DevOps & Tools: Git, GitHub, VS Code, Postman

Core Concepts: Data Structures & Algorithms, OOP, System Design

Relevant Coursework

- | | | | |
|--------------------|-----------------------|---------------------|------------------------|
| • Data Structures | • Python | • Operating Systems | • System Design |
| • Algorithms | • Database Management | • OOP | • Software Engineering |
| • Java Programming | • Computer Networks | • Web Development | • AI / ML Basics |

Experience

CODEC Technologies

April 2026 – June 2026

Web Developer Intern

Remote

- Developed responsive web applications using HTML, CSS, JavaScript, and MySQL.
- Designed and implemented user-friendly interfaces to improve user experience and website performance.
- Collaborated with the development team to debug, test, and optimize web applications.
- Assisted in backend integration and database management for dynamic web applications.
- Gained practical experience in full-stack development, software testing, and project deployment.

Projects

AI-Powered E-Commerce Platform

2024

Java, Spring Boot, MySQL, REST APIs

- Built a scalable AI-powered e-commerce platform using Java and Spring Boot with modular backend architecture.
- Developed ML-based recommendation system to suggest personalized products based on user behavior and purchase history.
- Implemented efficient product search, filtering, and ranking system to enhance user experience and conversion rate.
- Designed secure REST APIs with MySQL for user management, orders, inventory, and payment workflow.

AI-Powered Multi-Agent Hiring & Resume Screener

2024

Java, Spring Boot, Python, FastAPI, LangChain, PostgreSQL, ChromaDB, OpenAI API, React.js

- Developed an AI-powered resume screening system for automated candidate evaluation using LLMs.
- Built resume parsing and job-matching features using LangChain and OpenAI API for semantic analysis.
- Implemented backend APIs with Spring Boot and FastAPI for scalable resume processing pipelines.
- Integrated PostgreSQL and ChromaDB for structured storage and high-performance semantic search.

Certifications

- **Microsoft:** Develop AI Agents on Azure – completed using Azure technologies.
- **Microsoft:** Create Vision Models with Azure AI Custom Vision.
- **Cisco Networking Academy:** Introduction to Cybersecurity.

Leadership / Extracurricular

- **Student Organizer, Universumm National Youth Festival:** Coordinated logistics, managed student teams, and ensured the successful execution of large-scale university events.
